

IAESTE Switzerland's mission statement

We offer a professional service with a student's heart

We find qualified and motivated interns for demanding internships. As competent contacts for Swiss employers and students, we try to tailor our services as much as possible to the requirements of employers and students. At the same time, with help from our local committees, IAESTE is firmly rooted in the university environment. IAESTE Switzerland is characterized by the combination of the national office's professionalism and our local committees' volunteer work.

We promote intercultural competence

Our work is guided by tolerance and respect towards other cultures. We promote intercultural competence of both our students and Swiss employers. The exchange programme facilitates the building of bridges between different cultures.

We network at an international level

IAESTE offers a worldwide network from which both Swiss students and Swiss employers can benefit. Our network connects students, companies and universities all over the world. It is part of our daily work to constantly maintain and expand this network.

We recruit qualified students

We find a suitable candidate for each position. Interns in Switzerland are taken care of by our local committees. They offer a wide range of social events, providing the foreign interns with the possibility of discovering various aspects of Switzerland.

We provide an incentive

Our work allows us to motivate young people to gain practical experience abroad while at the same time encouraging their interest in technical professions. We offer students the opportunity to carry out interesting and paid work abroad during their studies already.

We promote the development of future leaders

We offer practical experience, an international network and intercultural competence. Therefore, IAESTE is able to help prepare young academics in the scientific and technical field for international careers.
