

23 June 2011, Burgdorf

IAESTE INTERNSHIP EXPERIENCE

Hello,

My name is Mateusz, and for last 2 months I was working on the BAUS (Bern University of Applied Sciences) in Burgdorf ,where is placed Faculty of Engineering and Information Technology.

I had to implement the Ethernet protocol (GOOSE messages from IEC 61850 Standard) on the board with Cortex M3. It was first time, when I was working in English language, and it was no problem, that I can not speak German.

During internship in BFH-TI I was working with good specialists and, what is also very important, I had opportunity to work in well equipped laboratories. BFH-TI, it is a place where you can learn a lot and there is always somebody who has time, and is ready to help you.

Visiting Switzerland is something what I will remember for very long time. This clear rivers, beautiful hills with forests, glacier in the highest part of the Alps, very nice and helpful people. Punctual trains and good cheeses. If you want to see all of it you must visit Switzerland! And if you want to combine work experience with beauty of this country you must check BFH-TI.

Mateusz,
