

IAESTE INTERNSHIP REPORT

AT SOLCEPT AG, WETZIKON, SWITZERLAND

SEP 2023 // PREPARED BY ODUMOSU TOBI
COVENANT UNIVERSITY, OTA, NIGERIA

IAESTE Work. Experience.

My name is Odumosu Oluwatobi Excelle and I am a student at Covenant University, Ota, Nigeria. I recently concluded my embedded systems trainee internship at Solcept AG, Wetzikon, Switzerland. This was a paid internship facilitated by IAESTE - the International Association for the Exchange of Students for Technical Experience.

The opportunity to work at Solcept AG was wonderful all around, I was able to learn a lot under my supervisor and from all of my colleagues in the field of Embedded Systems and related topics, even further than what I learned in this field, I was able to develop many positive relationships in and out of the office. The work environment at Solcept AG is truly wonderful, working here reinforced to me how great and important it is to work in a warm and hospitable environment.

IAESTE

Work. Experience.

My main task at Solcept was to build a demonstrator to show the capabilities of the Renesas Functional Safety Framework and to test and document the results, showing its compatibility with future projects.

I was able to organize my accommodation through IAESTE which was great, and on my arrival, I also had someone from IAESTE who guided me in settling in. This made coming to Switzerland very comfortable for me as I could start off with work immediately.

Switzerland is a beautiful country, I was able to visit some of the alluring places here and they were all amazing. IAESTE also organized weekly meetups, as well as hiking trips and more, which is a good way to get familiar with Switzerland if you're new, and meet new people.

Work. Experience.

IAESTE

In all, I was able to grow in so many ways during my stay here, from my field of study and its applicability to developing wonderful relationships with new people. I learned a bit of German and Swiss-German too which was interesting for me. After this internship, I have a better idea of how to continue my journey in my field and career.

The Swiss experience was definitely a good one.

Danke und tschüss 🙌
